Pattern – Plotts -Tabellen

Art.-Nr.: FTS 96401

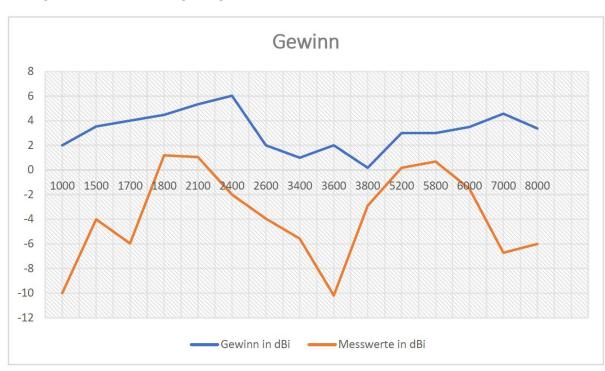

Die FTS Clear Window 5G-N78 Antenne wurde in Deutschland entwickelt. Messungen wurden an einem Standard Fenster mit Doppelverglasung durchgeführt. Die Messungen wurden mit Messplätzen von Rohde & Schwarz durchgeführt. Als Mess- bzw. Vergleichsantennen wurden Aaronia 4060 HyperLog Antennen verwendet.

VSWR in dBmag der FTS Clear Window 5G-N78 Antenne | Microwave Antenna

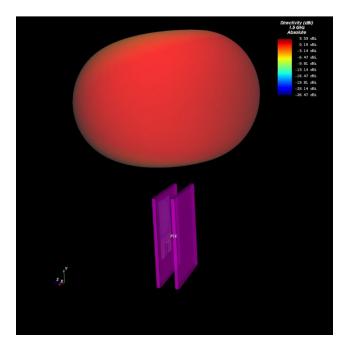

Gewinn der Clear Window 5G-N78 Antenne

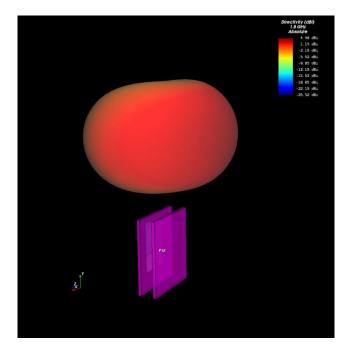

Die Gewinnangaben wurden in Hauptstrahlrichtung (90° vom Fenster abgehend) ermittelt. 5mm vor dem Fenster. Messungen in anderen Richtungen ergeben andere Werte.

VSWR der FTS Clear Window 5G-N78 Antenne

Die FTS Clear Window 5G-N78 Antenne (FTS 96401) wurde von FTS Hennig entwickelt. Die Fertigung erfolgt in Europa.

FTS Hennig erklärt, dass sich die Clear Window 5G-N78 Antenne in Übereinstimmung mit den grundlegenden Anforderungen und den anderen relevanten Vorschriften der Richtlinien 2014/53/EU, 2009/125/EG sowie 2011/65/EU befindet.

Die Antenne entspricht vollumfänglich der RoHS, CE und IEC-Richtlinien.
